**AVAILABILITY**

**Highly pigmented, ready-to-use acrylic screen printing inks with excellent colour strength and lightfastness.**

System3's rich pigmentation gives the strong clear colour definition demanded by professional printmakers. Inks have been developed to be ready for use straight from the pot or can be thinned further with screen printing mediums should it be desired. The inks have been designed to permit longer working time on the screens and avoid blocking during print runs. They have optimal consistency for screen printing applications.

Easy to clean off equipment with water, these safe, solvent-free alternatives to traditional oil-based inks are ideal for screen printing on paper, fabric and board.

System3 textile acrylic printing colours have excellent wash fastness and work well on cotton, cotton mixes, synthetic, silk and natural fibres. For best results heat fix once dry using an iron on the reverse side of the textile.

Discover the complete System3 Screen Printing Acrylic suite of perfectly compatible products.

§ For technical reasons the printed colours do not match 100% the painted colours, but deliver the best possible reference point.
